

Latest scientific outcomes on the geological storage of CO₂: CO₂GeoNet Open Forum 2011 presentations available on www.co2geonet.eu

- Researchers from all over Europe have met in Venice from 9th to 11th May 2011 to present and discuss the state-of-the-art on CO₂ geological storage, a key technology for abating CO₂ industrial emissions. Presentations from the Forum are now available at www.co2geonet.eu covering the following areas: European research projects, research trends and funding schemes in Europe, status of pilot projects, field experiments and large scale demos of the EEPF and NER300 program, status of the legislation at European and national level.
- The organisers, CO₂GeoNet (the European Network of Excellence on CO₂ Geological Storage) and CGS Europe (the Pan European coordination action on CO₂ Geological Storage www.cgseurope.net) together represent 34 research institutes spanning 28 European countries, pooling long-standing experience on the topic and widespread exchange.
